

# Bilston High Street Link

## How could Bilston High Street Link be improved?

City of Wolverhampton Council (CWC) is planning to improve the pathway, and areas next to it, between WV Active Bilston-Bert Williams Leisure Centre and Bilston town centre. This is the area marked in red in the picture.

Tell us your ideas for how this land could be used by the local community and groups, especially young people.

The results from the survey will help us shortlist ideas that will be discussed with residents and community groups at future events in 2025.

Artist's impression of Bilston High Street Link

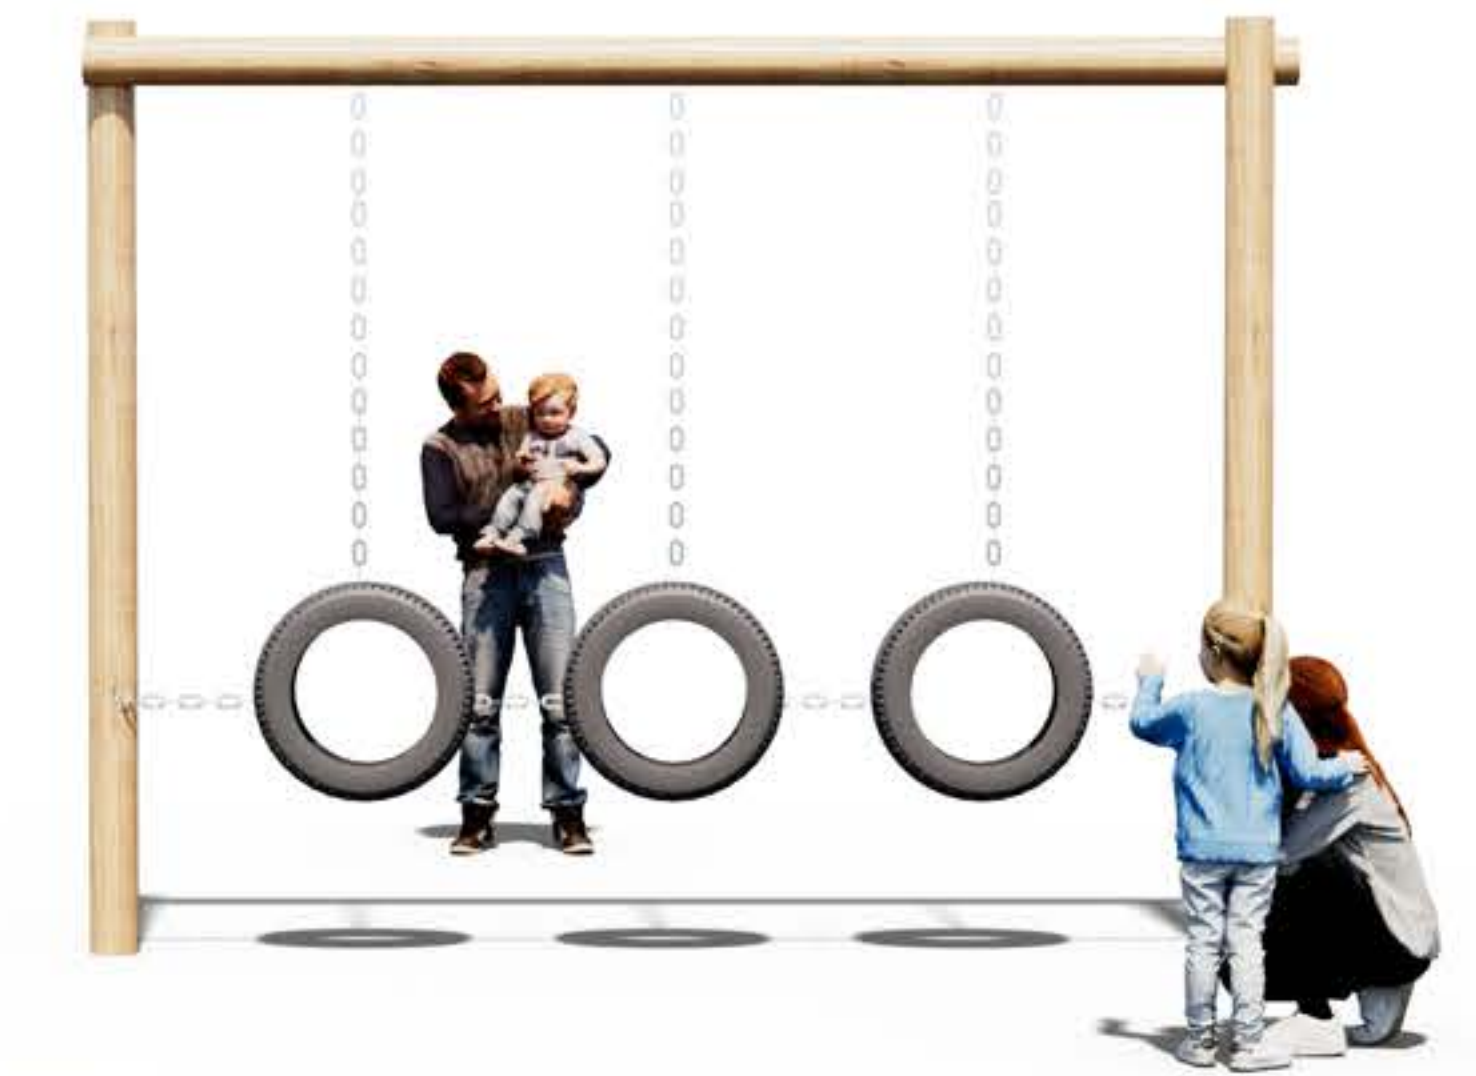

In a previous online survey we asked you to select three uses for Bilston High Street Link from six we showed you. We spoke to several schools for their thoughts too. We also asked you to put the uses you selected into an order of priority. **Play, Food & Drink and Nature** were the three most popular uses. We now need your help to select the use for the land you would most like to see and what you would like on it.

## What things should be in the Bilston High Street Link if it is used for **Play**?

These pictures are to help you think of things you would like to see. They are examples only. We look forward to hearing your ideas.
